Product Overview

Composition (per 30 gm):

Gabapentin I.P.

6% w/w - Primary neuropathic pain modulator

Lidocaine HCl I.P.

5% w/w - Local anaesthetic for immediate relief

Baclofen I.P.

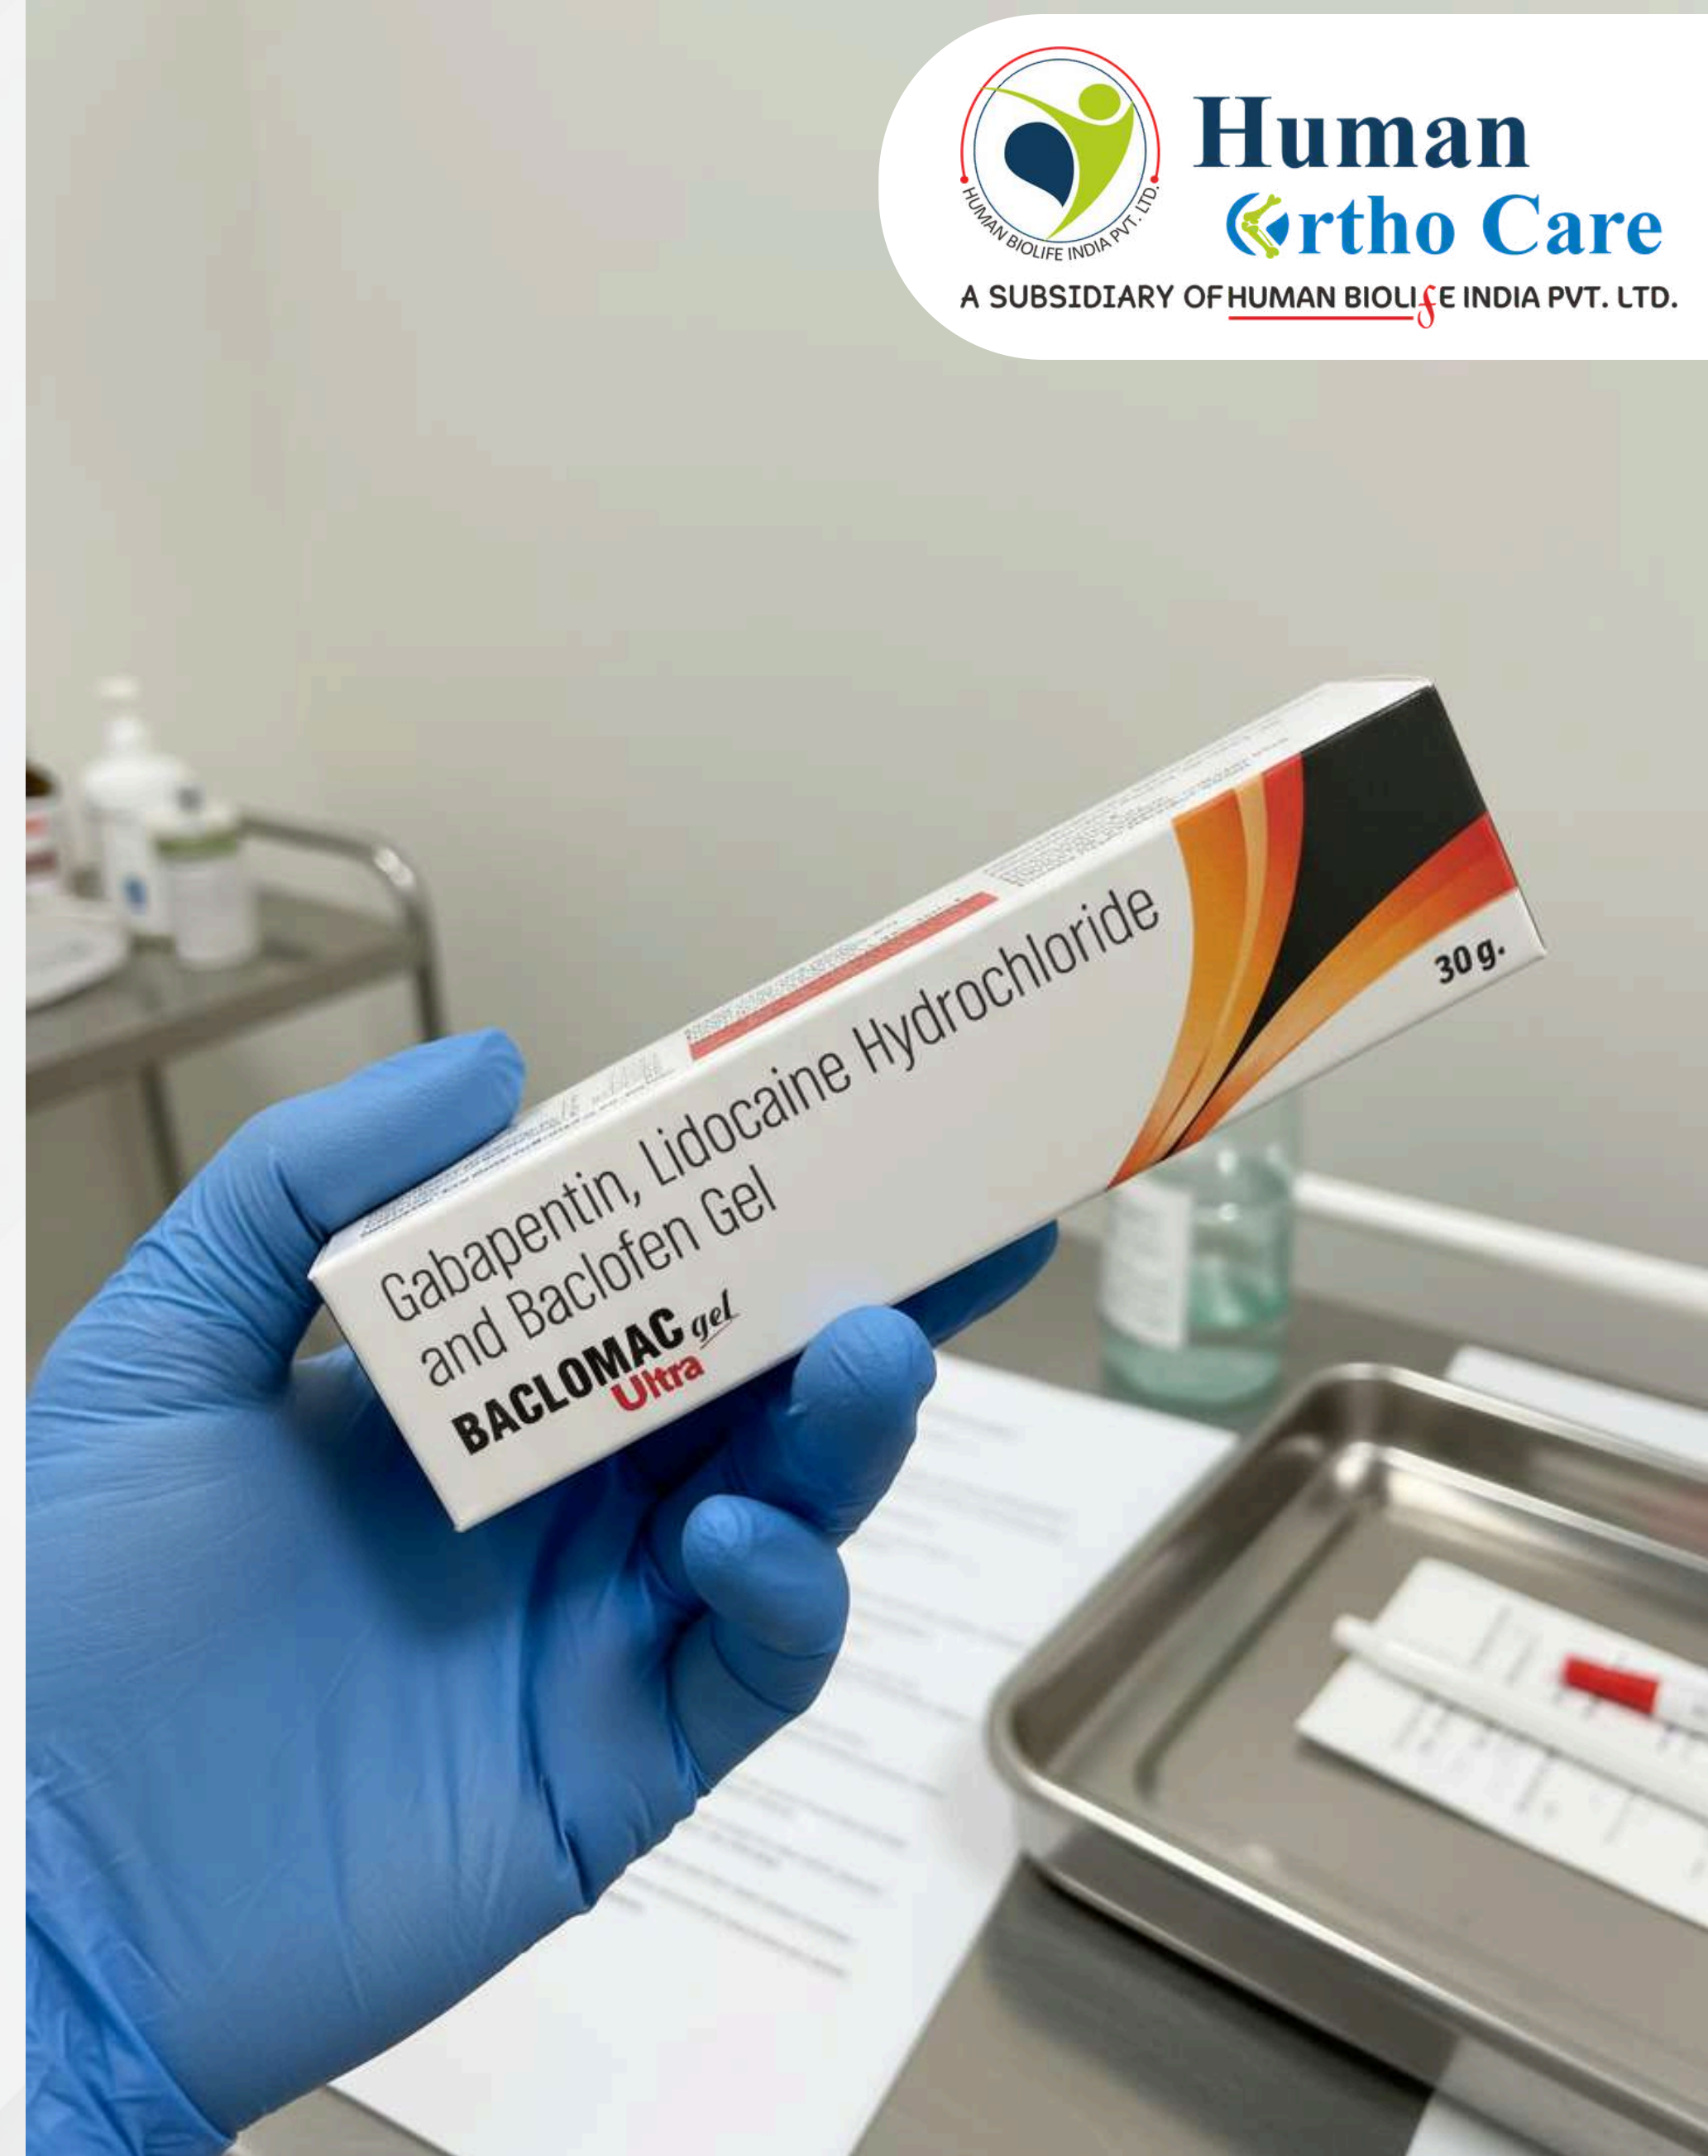

2% w/w - Muscle relaxant and antispasmodic

Methyl Paraben I.P.

0.10% w/w - Preservative for stability

Propyl Paraben I.P.

0.05% w/w - Preservative for safety

Role of Key Ingredients

Gabapentin (6%)

- ✓ Modulates calcium channels → reduces neuropathic pain signalling
- ✓ Effective in diabetic neuropathy, post-herpetic neuralgia

Lidocaine HCl (5%)

- ✓ Local anaesthetic → immediate pain relief
- ✓ Blocks sodium channels → reduces nerve excitability

Baclofen (2%)

- ✓ Muscle relaxant (GABA-B agonist)
- ✓ Reduces spasms, stiffness & muscle pain

Methyl & Propyl Paraben

- ✓ Preservatives → maintain product stability & safety

Indications

💡 BacloMAC Ultra Gel is recommended for:

Neuropathic Pain

Diabetic neuropathy, sciatica, neuralgia

Muscle Spasms

Musculoskeletal pain and stiffness

Localised Nerve Pain

Fibromyalgia and chronic pain conditions

Post-Herpetic Neuralgia

Persistent pain following shingles

Chronic Back Pain

Cervical/lumbar spondylosis

Sports Injuries

With neuropathic components

Clinical Advantages

★ Key Benefits of Baclomac Ultra Gel:

Triple Mechanism

Pain relief + Muscle relaxation + Local anaesthesia working synergistically for comprehensive treatment

Quality of Life

Improves daily functioning in chronic pain conditions, enabling better mobility and comfort

Topical Delivery

Reduced systemic side effects compared to oral medications while maintaining therapeutic efficacy

Convenient Formulation

Non-invasive, easy-to-apply gel that integrates seamlessly into daily care routines

Rapid Onset

Quick action with long-lasting effect, providing sustained relief throughout the day

Comparison with Other Topical Agents

Parameter	Baclomac Ultra Gel (Multi-Combo)	Lidocaine Gel Only	Diclofenac Gel
Neuropathic Pain	✓ Strong (Gabapentin + Lidocaine)	⚠ Temporary only	✗ Not effective
Muscle Relaxation	✓ Baclofen present	✗ Absent	✗ Absent
Local Anaesthesia	✓ Lidocaine 5%	✓ Strong	✗ Absent
Chronic Pain Relief	✓ Superior	⚠ Moderate	⚠ Moderate

Dosage & Administration

Application Instructions:

01

Clean the Area

Ensure the affected area is clean and dry before application

02

Apply Thin Layer

Apply a thin layer of Baclomac Ultra Gel on the affected area

03

Gentle Massage

Gently massage until completely absorbed into the skin

04

Frequency

Use 2–3 times daily or as directed by physician

  **For external use only**

 Avoid contact with eyes, mucous membranes & broken skin

Safety & Tolerability

Generally Well-Tolerated

Possible Local Side Effects:

Mild Reactions

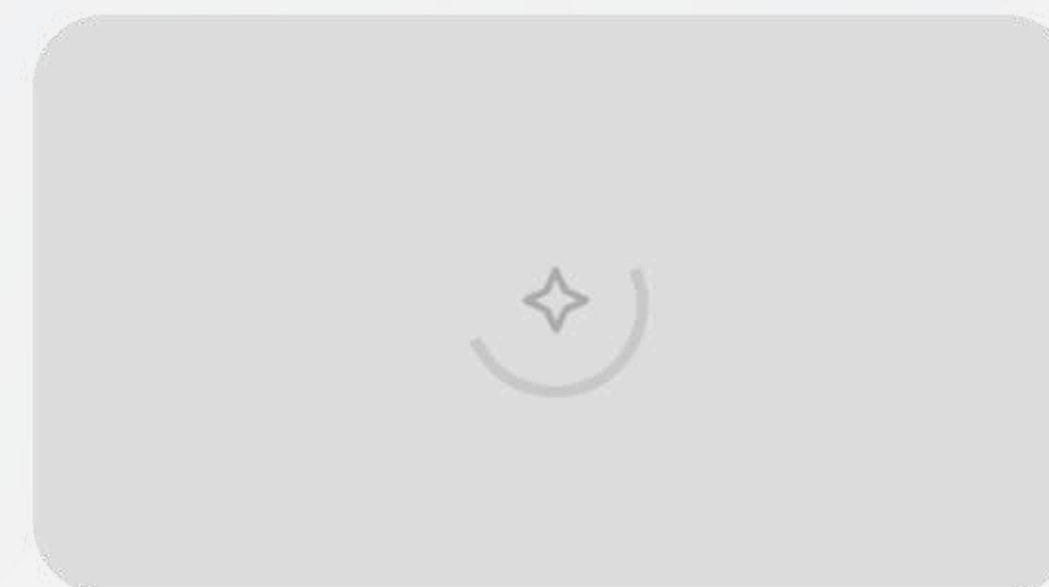

Mild burning, redness, itching (rare)

Allergic Response

Allergic rash (very rare)

Contraindications:

- Hypersensitivity to any component
- Open wounds or severely damaged skin
- Avoid prolonged use over large body areas

 **Safety Profile:** Topical application minimises systemic exposure and reduces the risk of systemic adverse effects commonly associated with oral pain medications.

Why Prescribe Baclomac Ultra Gel?

👨‍⚕️ Doctor's Choice For:

Multi-Targeted Relief ✓ Neuropathic + Musculoskeletal + Local pain management in one formulation	Superior Efficacy ✓ Enhanced effectiveness vs single-agent topical gels through synergistic action	Non-Invasive Alternative ✓ Safer option compared to oral painkillers with reduced systemic side effects
Minimal Systemic Absorption ✓ Localised action with excellent safety profile for long-term use	Trusted Quality ✓ Reliable formulation from <i>Human Orthocare</i> with proven clinical results
