Product Overview

Composition (per tablet):

- Calcium Aspartate – 500 mg
- Calcium Orotate – 500 mg
- Calcitriol I.P. – 0.25 mcg
- Zinc Sulphate Monohydrate I.P. – 7.5 mg
- Magnesium Hydroxide I.P. – 50 mg
- Hydroxycobalamin U.S.P. – 100 mcg
- Folic Acid – 1.5 mg

Dual Calcium Advantage

Aspartate + Orotate for superior absorption

Optimal Utilisation

Calcitriol ensures maximum calcium uptake

Bone Metabolism

Zinc & Magnesium support healthy bones

Neuroprotection

B12 + Folic Acid for nerve health

Complete Formula

Bone + nerve support in one tablet

Role of Key Ingredients

Calcium Aspartate (500 mg)

Highly bioavailable calcium source that supports bone density and provides superior absorption compared to traditional calcium forms.

Calcium Orotate (500 mg)

Enhances calcium penetration into bone matrix, ensuring optimal delivery to where it's needed most for bone strength.

Calcitriol (0.25 mcg)

Active Vitamin D3 that dramatically improves calcium absorption in the intestines and promotes bone mineralisation.

Magnesium Hydroxide (50 mg)

Regulates calcium metabolism and supports proper neuromuscular function, essential for bone health and muscle contraction.

Zinc (7.5 mg)

Aids collagen formation and accelerates fracture healing, playing a crucial role in bone tissue repair and regeneration.

Hydroxycobalamin (100 mcg)

Neurotropic vitamin B12 essential for nerve repair, myelin synthesis, and overall neurological health and function.

Folic Acid (1.5 mg)

Works synergistically with B12 for comprehensive neurological and cardiovascular health, supporting cellular repair processes.

Clinical Indications

Calcirix® Next Tablets are specifically recommended for comprehensive bone and nerve health management:

- Osteoporosis & Osteopenia**
Prevention and management of bone density loss
- Post-menopausal Bone Weakness**
Addressing hormonal changes affecting bone health
- Calcium & Vitamin D Deficiency**
Comprehensive supplementation for nutritional gaps
- Diabetic Neuropathy**
Peripheral nerve weakness and neuropathic conditions
- Fracture Recovery**
Enhanced bone healing after fractures or surgery
- Musculoskeletal Pain**
Chronic pain and fatigue related to bone health

Clinical Advantages

Key Benefits of Calcirix® Next

Superior Absorption

Dual calcium forms provide better absorption and utilisation than single-source supplements

Optimal Mineralisation

Active Vitamin D3 ensures optimal bone mineralisation and calcium deposition

Neuroprotection

B12 + Folate combination provides comprehensive nerve protection and neuropathy management

Synergistic Support

Zinc & Magnesium provide synergistic bone and metabolic support for enhanced efficacy

Comprehensive Care

One tablet addresses bone, joint, and nerve health together for complete patient care

Comparison with Other Supplements

Parameter	Calcirix® Next (Multi-Combo)	Calcirix Coral (Ca + D3)	Calcitriol Alone
Calcium Absorption	✓ Dual Salts (Aspartate + Orotate)	⚠ Single Source	✗ Absent
Bone Mineralisation	✓ Excellent	✓ Moderate	⚠ Partial
Nerve Support	✓ B12 + Folate	✗ Absent	✗ Absent
Metabolic Balance	✓ Mg + Zn present	⚠ Limited	✗ Absent
Comprehensive Care	✓ Complete	✗ Limited	✗ Limited

✓ **Calcirix® Next** provides the most comprehensive approach to bone and nerve health with its unique multi-ingredient formulation.

Dosage & Administration

- Standard Dosage**
1 Tablet once or twice daily after meals
Timing with meals enhances absorption and reduces gastric irritation
- Professional Guidance**
Or as directed by physician
Dosage may be adjusted based on individual patient needs and clinical assessment

Important Administration Guidelines

- **Ensure adequate hydration** - Drink plenty of water throughout the day
- **Avoid excess calcium intake** from other sources to prevent hypercalcemia
- **Take with food** to optimise absorption and minimise gastric irritation

Safety & Tolerability

Generally Well-Tolerated

Calcirix® Next has an excellent safety profile with minimal adverse effects reported in clinical use.

Rare Side Effects

Possible mild effects:

- Mild gastric irritation (rare)
- Constipation or bloating (rare, with calcium)

⊗ Contraindications

- **Hypercalcemia or hypervitaminosis D** - Avoid in patients with elevated calcium or vitamin D levels
- **Severe renal impairment** - Use with caution in kidney disease patients
- **Known hypersensitivity** - Do not use if allergic to any ingredients

Regular monitoring of serum calcium levels is recommended during long-term therapy, particularly in elderly patients or those with renal impairment.

Why Prescribe Calcirix® Next?

The Doctor's Choice For Comprehensive Care

Maximum Bone Strength

Dual calcium + Vitamin D3 combination provides superior bone mineralisation and strength compared to single-ingredient supplements

Comprehensive Nerve Protection

Hydroxycobalamin + Folate combination offers complete neuroprotection and supports nerve repair in diabetic and peripheral neuropathy

Enhanced Fracture Healing

Magnesium + Zinc support accelerates bone healing processes and improves recovery outcomes in post-surgical and fracture patients

Ideal for Multiple Conditions

Perfect for osteoporosis, neuropathy, and post-menopausal care - addressing multiple patient needs with one comprehensive formulation

Trusted Quality

Backed by the reputation and quality assurance of Human Orthocare, ensuring consistent therapeutic outcomes
