Product Overview

Composition (per tablet):

Flupirtine Maleate

100 mg

Centrally acting non-opioid analgesic with muscle relaxant action

Paracetamol

325 mg

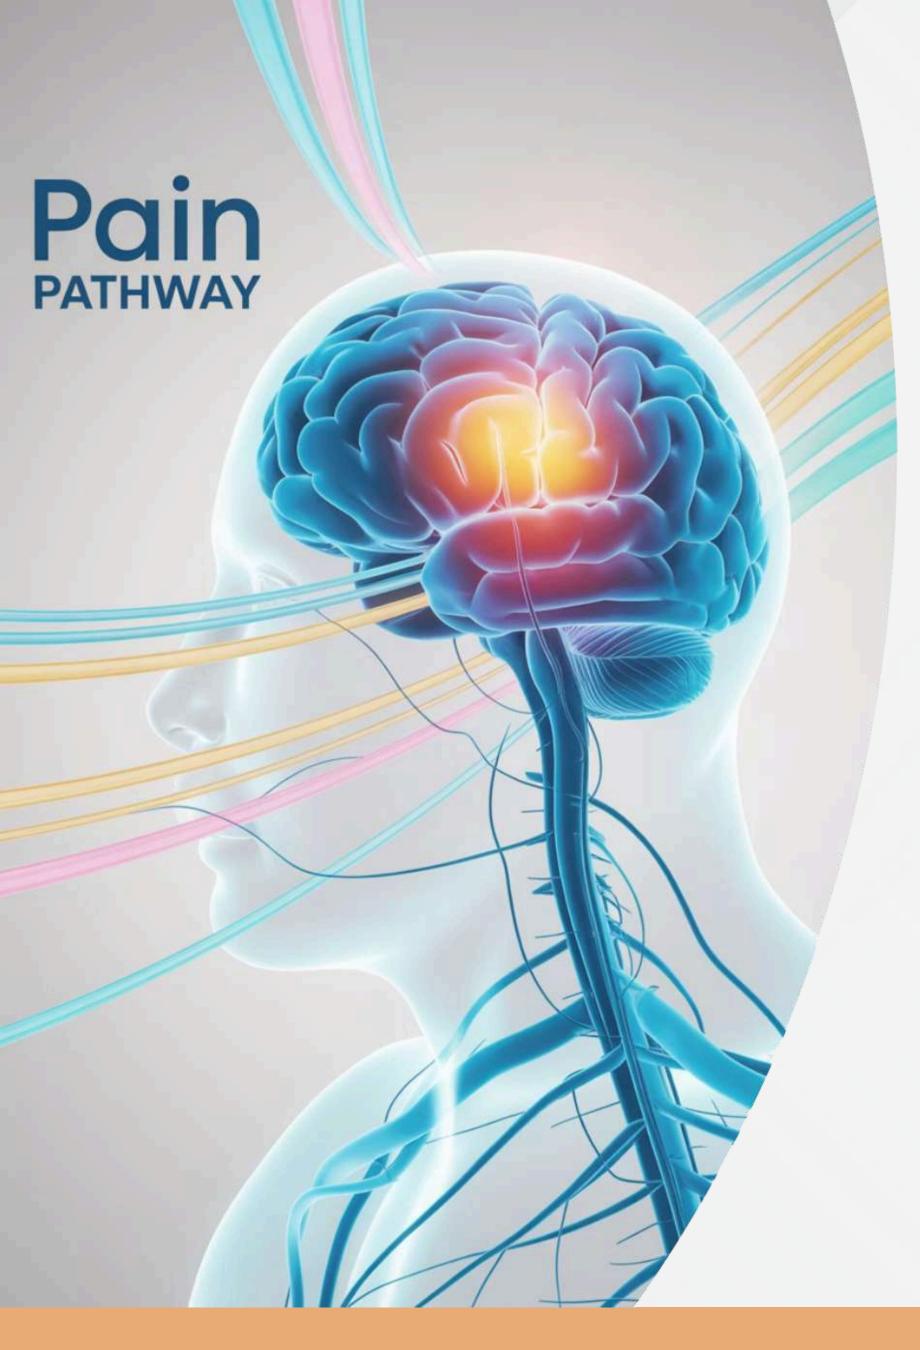

Peripheral & central analgesic with strong antipyretic effect

Dual Synergy

Stronger pain relief compared to monotherapy through combined mechanisms

Comprehensive Coverage

Effective in acute, chronic and neuropathic pain conditions

Mechanism of Action

Flupirtine Action

- Selective neuronal potassium channel opener (SNEPCO)
- Indirect NMDA receptor antagonist → prevents central sensitisation
- Provides both analgesia & muscle relaxation

Paracetamol Action

- Centrally inhibits prostaglandin synthesis
- Rapid onset analgesic & antipyretic effects

Combined Result

Comprehensive dual pain control: central + peripheral

Indications

Flupinex-Plus Tablets are recommended for:

Musculoskeletal Conditions

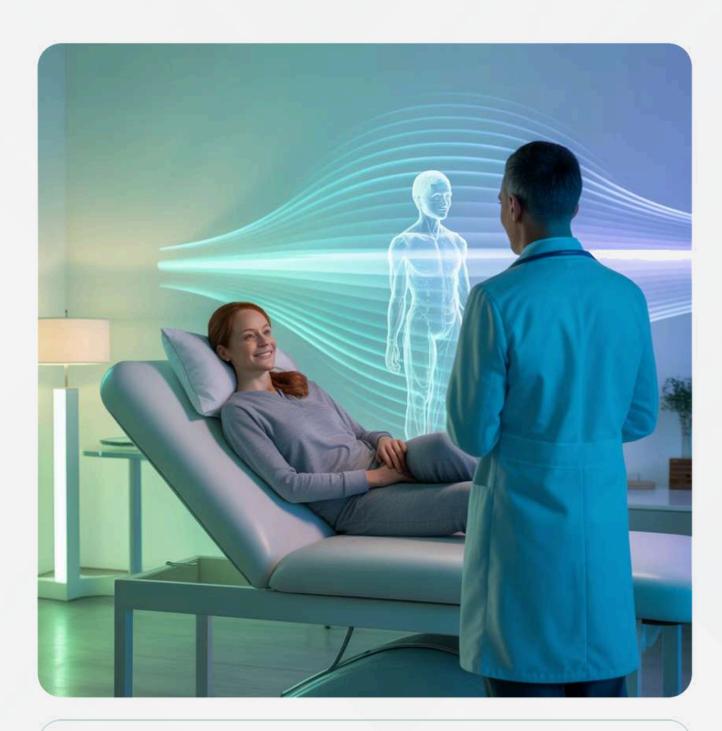

- Chronic back pain
- Spondylosis
- Fibromyalgia & myalgia

Arthritis Management

- Osteoarthritis
- Rheumatoid arthritis

Neuropathic Pain

Various neuropathic pain syndromes

Post-Procedural Pain

- Post-traumatic pain
- Post-operative pain

General Pain Management

- Dental pain
- Headache management

Clinical Advantages

Key Benefits of Flupinex-Plus:

Dual Mechanism

Broader and stronger analgesia through combined central and peripheral action

Safety Profile

Non-opioid, non-NSAID formulation with safer gastric and renal profile

Comprehensive Relief

Provides both pain relief and muscle relaxation in one tablet

Versatile Application

Effective in acute, chronic and neuropathic pain conditions

Patient Compliance

Better patient compliance compared to multiple drug therapy

Comparison with Conventional Analgesics

Parameter	Flupinex-Plus (Flupirtine + PCM)	NSAIDs Alone	Opioids
Analgesic Effect	✓ Strong (Central + Peripheral)	✓ Moderate	✓ Strong
Muscle Relaxation	✓ Yes (Flupirtine)	X No	↑ Mild
GI/Renal Toxicity	✓ Minimal	X High	V Low
Dependence Risk	X None	X None	A High
Neuropathic Pain Use	✓ Effective	X Limited	<u>↑</u> Variable

Dosage & Administration

Standard Dosage

1 Tablet 2–3 times daily

Maximum: 400 mg Flupirtine per day

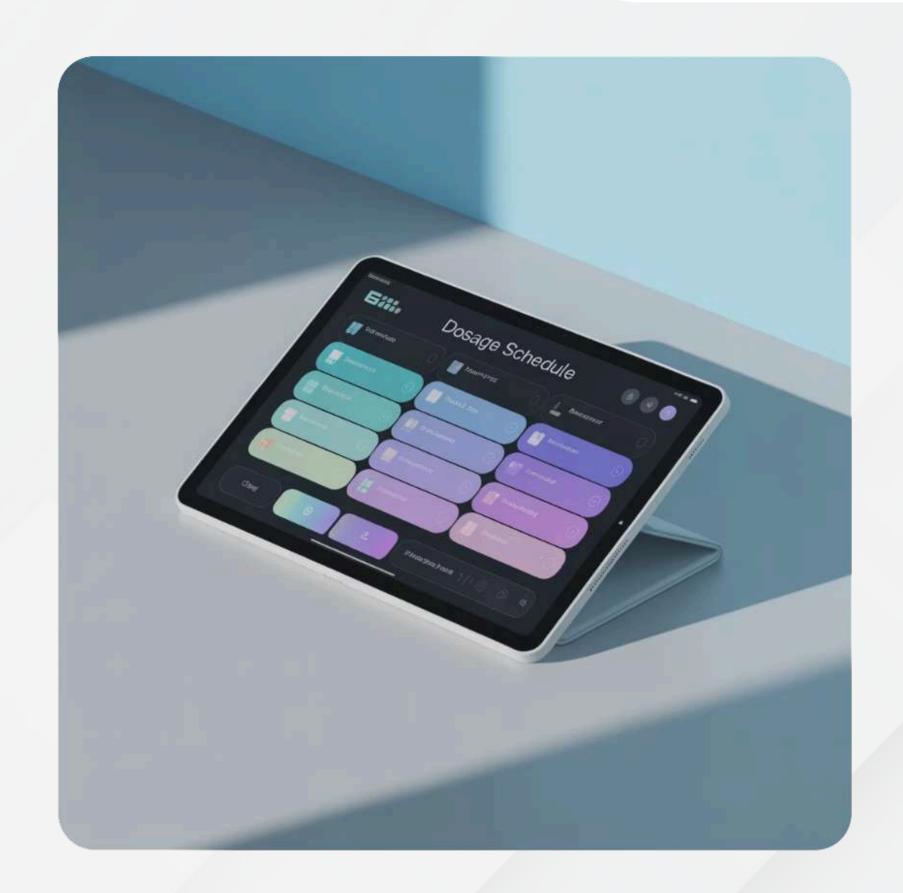

Medical Guidance

Or as directed by physician

Important: Monitor liver function in long-term therapy (Flupirtine + PCM combination)

Safety & Tolerability

Generally Well-Tolerated

Possible Side Effects:

- Drowsiness, dizziness, fatigue (doserelated)
- Nausea or mild Gl upset
- Rare: hepatotoxicity → requires monitoring in long-term use

Contraindications:

Hepatic Conditions

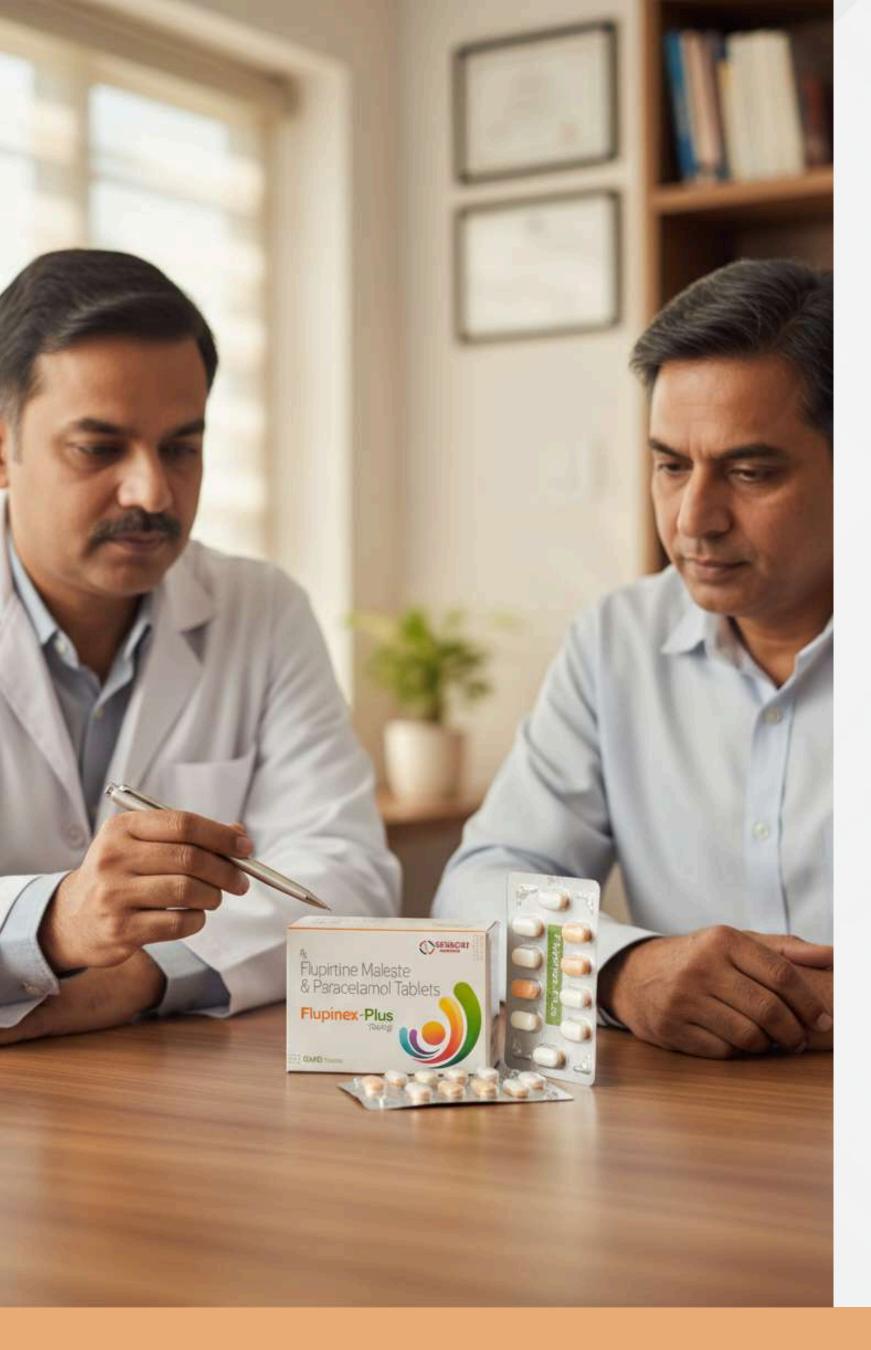

Severe hepatic impairment

Substance Use

Alcohol abuse or hepatotoxic drug use

Special Populations

Pregnancy & lactation

Why Prescribe Flupinex-Plus?

Doctor's Choice For:

D

0

1

Superior Efficacy

Stronger pain relief compared to Flupirtine or PCM alone

Dual Action

Effective dual central + peripheral analgesic action

Versatile Application

Effective in both acute & chronic pain syndromes

+

Multiple Benefits

Provides muscle relaxation + antipyretic benefit
